

# Prismatic Keyboard USER GUIDE

## 【Specification】

Type : Ultrathin mechanical keyboard  
 Number of keys : 67K layout  
 Backlit : RGB  
 Transmission mode : Separated braided cable, 1.2m  
 Connector : USB interface, gold plated  
 Switch lifetime : more than 70 million times  
 Voltage : 160mA  
 Size : L 293 \* W 103 \* H 17mm  
 Net weight : 306g±5g

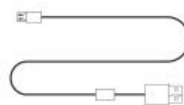

Keyboard x 1

## 【 Main Features】

- Support wired & bluetooth modes
- Metal upper case
- Ultrathin body
- Cool RGB backlit
- High-end performance
- Custom setting available

#### 4. Steady Lighting

FN+"ALT-R"+"←/→"=Switch four sides lighting color

(8 color: red-green-blue-yellow-purple-cyan-white-mixed color)

#### 5. Breath

FN+"ALT-R"+"}" = Four sides lighting speed up, 4 levels adjust

FN+"ALT-R"+"{ [" = Four sides lighting speed down, 4 levels adjust

FN+"ALT-R"+"←/→"=Switch four sides lighting color

(8 color: red-green-blue-yellow-purple-cyan-white-mixed color)

6 . Neon

FN+"ALT-R"+"}"] = Four sides lighting speed up, 4 levels adjust  
FN+"ALT-R"+"{ [" = Four sides lighting speed down, 4 levels adjust

7 . Flicker

FN+"ALT-R"+"}"] = Four sides lighting speed up, 4 levels adjust  
FN+"ALT-R"+"{ [" = Four sides lighting speed down, 4 levels adjust

8 . Random transformation

FN+"ALT-R"+"}"] = Four sides lighting speed up, 4 levels adjust  
FN+"ALT-R"+"{ [" = Four sides lighting speed down, 4 levels adjust

9 . Turn off

### 【 Bluetooth part (without backlit) 】

1. Press FN + "ESC" and hold on 2 seconds to bluetooth mode, meanwhile, all lights turn off. Only when "ESC" flickers blue light and begins searching default device 1 does it stand for entering bluetooth mode. Default setting is wired status. When switching wired & bluetooth modes, the keyboard will remember the current status.

2. The keyboard supports connecting 3 devices under bluetooth mode through combined key Fn+SHIFT-L (device 1 code key),Fn+CTRL-L(device 2 code key) and Fn+ALT-L(device 3 code key). Then press FN+Q\FN+E\FN+R to switch around device 1 & 2 & 3.

First, press "Fn+SHIFT-L" and hold on 3 seconds to code device 1.

Second, "ESC" flickers blue light for 2 seconds and turns off for 1 second,

Third, "ESC" flickers to search device and turns off after connected.

Fourth, press "Fn+CTRL-L" and hold on 3 seconds to code device 2.

Fifth, press "ESC" flickers blue light for 2 seconds and turns off for 1 second,

Sixth, "ESC" flickers to search device and turns off afterconnected.

Seventh, press "Fn+ALT-L" and hold on 3 seconds to code device 3.

Eighth, "ESC" flickers blue light for 2 seconds and turns off for 1 second,

Ninth, "ESC" flickers to search device and turns off after connected.

If the device can't be connected with the keyboard within 1 minute, then automatically exits and backs to the previous state.

After 3 devices code successfully, you can press Fn+Q/Fn+E/Fn+R to switch them.

If changing the devices, press Fn+SHIFT-L/ Fn+CTRL-L/ Fn+ALT-L to re-code.

3. Bluetooth mode can't be changed to wired mode if USB cable isn't connected. Similarly, if you unplug the USB cable in wired mode, it will automatically switch to bluetooth mode. Only plugging in the USB cable can you switch wired and bluetooth modes by pressing FN + "ESC".

4. Charging indicator(red and green LED): Red light stands for charging. Green light is full.

5. Low voltage indicator ("ESC" red light): When battery voltage is lower than 3.3V and a key is triggered, "ESC" flickers red color, without trigger, the light turns off.

6. If no key is triggered within 3 minutes under normal working time, the keyboard will enter the power saving mode (sleep) and wake up by pressing any key.
7. Using lithium power supply, the keyboard starts charging by inserting USB cable and stops charging after full.

### 【Attention】

1. When changing bluetooth mode to wired mode, bluetooth battery switch must be turned off first and then plug the USB cable to connect the computer in case device can't be recognized by the computer for power conflict.
2. If you need to connect new device under bluetooth mode, you must clean up the old device first and press combined keys (Fn+SHIFT-L/ Fn+CTRL-L/ Fn+ALT-L) to re-code.
3. Although this product has automatic power-saving features, but in order to achieve further energy-saving effect and extend battery life, please turn off the power switch when not using.

4. If there is any abnormality during keyboard use, please turn off the bluetooth power switch and then turn it on to reconnect the device.
5. When USB cable is plugged to the computer, but pressing FN + ESC and holding on 2 seconds can't switch to wired mode, only the "B" key light flickers 1 time. That means the computer USB port isn't connected with the keyboard successfully. Please check whether the USB cable is plugged well or not.
6. When keyboard connects to a new device, but it doesn't work. Please replace different devices for testing. If you still can't use it after replacing, please send email to [Info@anidees.com](mailto:Info@anidees.com)
